

Like an electronic part manufacturer, we contribute to local and international electronic devices developer and manufacturers. Our mission to supply them with high quality, innovative products and provide professional appearance for theirs final devices.

We can do it because we are making high quality products, we continues offer improvements possibility to our customers. We believe that the innovation in our products and in production technologies will mean competitive advantage to our Partners.

Our priority that our Customers and Partners will be satisfied with our services and products.

Our basic effort the high level ensure of Customer satisfaction and keep it on. Our mission that our Partners would be satisfied with our manufactured products quality, price and deadlines.

To introduce our Quality Management System is new part of our development. Working of this system, we are going to verify our Partners satisfaction and our colleagues commitment for quality.

We are certain that our long term growing one of the most important key is the digitization. The basis for this is our custom developed and continues improved Company Management System (ERP) include the production and technology database. We believe that this can base of Industry 4.0 expectations as well.

We are always looking for the new production technologies, machines and materials. We continues testing and analysing them because we are sure that the innovation is one of the most important keystone.

Our Customers can be sure that our products and services will fit to all requirements includes the local and international laws and customer definitions.
